Computer Science 2: 2nd Quarter Project  
Documentation

**Why did we choose this topic?**

Our group chose the topic **Disaster Awareness and Preparedness** because we wanted to help our community become better prepared for emergencies such as floods, earthquakes, fires, and landslides. Many communities are at risk, and proper preparedness can save lives and reduce damage. We wanted to create a resource that helps our community understand how to respond to emergencies, prepare emergency kits, and stay safe during disasters. This project aims to educate and empower residents to act quickly and effectively when faced with natural hazards.

### **Individual contributions:**

#### **Member 1: Nicko S. Ditchon**

He reviewed our Canva design, checked the code for any errors, and contributed the most to creating and completing the overall code.

#### **Member 2: Adrhianna C. Gavia**

She designed the layout in Canva and also helped in writing and organizing the code for the website.

#### **Member 3: Philip Matthew Y. Dumanon**

He assisted in improving and writing parts of the code and checked for any errors to ensure the website functions properly.
